

WELCOME TO \$SLOTH

www.solstoth.com

About Us

We could say that Sloth was founded on the principles of unique artistry, unparalleled fun design and a strong community.

Although that would be a fair thing to say, we just wanted to make fun art that speaks to people and resonates with our community.

We wanted everyday people to find themselves among our sloths.

Sloths that resemble the day-to-day struggle of life, and the unique style in which people deal with it. We wanted to create a wide portfolio of sloths that mimic our society from fast food workers, artists, pimps, all the way to suited businessman. I mean, business-sloths. That's a word, now.

In 2021, we started creating the project, and assembling a team of crypto-enthusiasts to handle all the tasks. I would love to say that we are crypto professionals, but I am not sure who qualifies as such. Our team has been dealing with crypto for 3+ years now, mostly on the investment side. Our CEO, Marton is highly skilled in programming and has been super focused on crypto and NFTs since 2019.

We always wanted to build something fun on Solana because it is a technology that we are super passionate about.

Building on the fastest and most secure blockchain means, that our investors will have a smooth experience during the launch process..

Our \$SLOTH token on SOL will serve as the backbone of the project, allowing us to create unique mining NFT Collections on various blockchains! Our team includes Developers, Marketing Agents, Server Provider & Partners.

Project Summary

Welcome to the next BlueChip Solana Memecoin where we are revolutionizing the world of Non-Fungible Tokens (NFTs) and cryptocurrency mining.

In this whitepaper, we will delve into the details of the first groundbreaking Kaspas (KAS) Mining NFT Project, showcasing how we guarantee an exceptional mining hashrate on each NFT, our strategic partnerships with MillionMiner and EndlessPowerSolutions, the pricing structure, and the unique features that set us apart in the NFT mining space.

The NFTs will be called Bored Sloth Billionaires. We are committed to bringing innovation and value to the NFT market. Our first Mining NFT Project is a testament to this vision.

By merging the world of NFTs with cryptocurrency mining, we offer a unique opportunity for NFT collectors to not only own a piece of digital art but also enjoy a consistent and guaranteed mining revenue. When you invest in a SLOTH NFT, you are guaranteed a minimum mining hashrate for your investment. This commitment ensures that your NFT remains a valuable asset throughout its lifetime. With our strategic partnerships, we source the best miners at the most competitive prices, enabling us to provide this assurance to our valued NFT holders. Along with this, all \$SLOTH token holders will receive mining airdrops and rewards for holding the base token on the Solana blockchain!

Each BSB NFT is priced at \$500 and includes a 20-month mining contract that activates upon minting. This contract guarantees consistent mining rewards for the specified duration, allowing you to benefit from your NFT investment.

No need to worry about complex setup or maintenance, your mining contract is automatically initiated upon purchase.

Meet Our Team

Marton Ersek, CEO
Founder of the project
Crypto investor & enthusiast

Attila Katai, Server
Website / Hosting / Security
Partner: Infinx.hu

Andreas Pissinos, Marketing
Marketing Manager
Building brand on social media since
2012

Our Partners

With our strategic partnerships, we source the best miners at the most competitive prices, enabling us to provide this assurance to our valued NFT holders.

To fulfill our promise of delivering a high-quality mining experience, we have partnered with industry leaders, MillionMiner and EndlessPowerSolutions. Together, we secure the best mining equipment and ensure reliable, cost-effective, and redundant electricity sources across various locations.

This collaboration guarantees the longevity and profitability of your BSB NFT. MillionMiner is an international technology company with years of experience in mining cryptocurrencies. They sold over 30 thousand ASIC Miners Worldwide, and with this partnership, we will source our ASIC Miners for the best possible price! EndlessPowerSolutions is your go-to Hosting Company to get cheap electricity prices, and professional team to ensure your miners longevity and profitability.

They worked for a long time on a suitable cooling concept. Their cold air system ensures that every 2 seconds the entire air in the data center is completely exchanged, so that the best possible cooling performance is achieved without the use of environmentally harmful gases.

Together, we are going to create the most profitable NFT Collections, that will run by professionals in the best possible environment.

Buy \$SLOTH token now, and enjoy the holder bonus program such as mining airdrops.

... AUTOMATED PAYOUTS

At SLOTH, we prioritize convenience for our NFT holders. To simplify the process, we've implemented an automated payout system. Every day, at midnight Dubai (UAE) Timezone, our system calculates your earnings and sends them directly to your currently owned wallet address. You won't need to withdraw funds.. We've got you covered.

DASHBOARD

While automatic payouts ensure hassle-free income, we also understand the importance of transparency. We provide a user-friendly dashboard that allows you to track your SLOTH NFTs effortlessly. Even better, there's no need to connect your wallet to the dashboard, simply search for your wallet address, and all your mining NFTs, total hashrate, payouts, and more will be displayed for your convenience.

KAS MINING

Our commitment to providing the most optimal mining environment is a key factor in this equation. With shared-based ownership, \$SLOTH leverages its strategic partnerships with industry leaders, MillionMiner and EndlessPowerSolutions, to secure reliable and cost-effective electricity sources in various locations. This enables us to run the most profitable miners, ensuring that you benefit from the highest possible mining rewards.

Roadmap

Minting

We plan to launch our minting through a trusted launchpad platform with marketplaces. This will ensure our holders will have a trustable place to buy and sell our NFTs!

Asic Miners

The Asic Miners will arrive within ~2 weeks from minting date. Our Partner will ensure all devices are delivered to site.

NFT Mining

Once the Miners arrive to EndlessPowerSolutions, these machines will connect to their mining dashboard, and use our unique contract to send our payment daily.

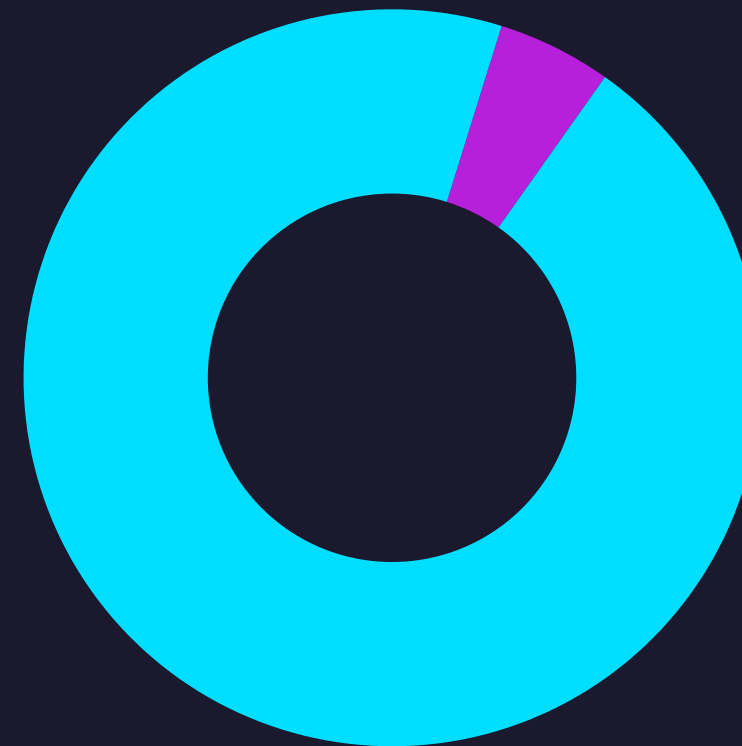

MINTING REVENUE

Distribution plan for minting day revenue

01 Asic Miner Purchase

95% of the Minting Revenue will be used to buy the latest generation of Asic Miners for the cheapest price by our partners!

We will ship them to EPS Facility within 7-10 days from minting date.

Marketing / Partnerships 02

We will allocate 5% of the minting revenue, and create a Marketing/Partnship fund to advertise the project and build a growing and sustainable model for future mining collections!

ARTWORK

Our Artwork contains over 200 hand drawn attribute with 4 base character, and many different colour versions. Every NFT is unique.
